

The Society for Ecumenical Studies

Growth in Agreement II - Reports and Agreements of Ecumenical Conversations at a World Level, 1982-1998

Edited by Jeffrey Gros, Harding Meyer and William G. Rusch

A review by David Carter, October 2001

This book constitutes a major and indispensable source for everyone seeking to keep abreast of the state of the international dialogues. Inevitably, it is already out of date, as it does not include *The Gift of Authority*, or *Speaking the Truth in Love* but it does bring together a mass of material often difficult otherwise to locate. I, personally, found it very useful to have all the reports of the very creative international Catholic-Lutheran dialogue together. Its enormous size makes the price, £23.50, seem very reasonable by current standards.
